

PAC2PAC

Swiss collection bag in circulation

Flagship Project:

We aim to massively increase the PET from mixed plastic collections for equivalent packaging!

General Goal:

✓ + 200 %

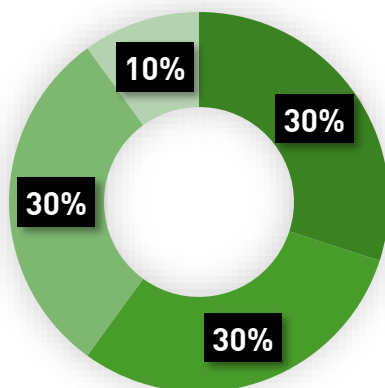

Process as much PET as possible into equivalent packaging and thereby increase the recycling rate.

Top Goal:

✓ all approvals

We produce transparent monofilms for food, complying with all regulations and limits. A food package remains a food package!

PET recovery form the collection bag

- Transparent film for food
- Transparent film for technic
- Colored film for horticulture
- Thermal utilisation in waste incineration plants (currently around 80 %)
